

Alireza Amini

Senior Front-End Developer

An Experienced front-end developer with +5 years of building high-quality and scaleable products using cutting-edge technologies like Next.js, paired with Git-flow, testing libraries, and third libraries. I enjoy working in teams in Agile-driven environments to manage projects and tasks.

WORK EXPERIENCE

Senior Front-End Developer June 2022 – Present (1 year and 4 months)

Tas'hil-Car, Engineering Team, Tehran, Iran

At Tas'hil-Car, we revolutionize affordability with innovative financial solutions, reshaping the credit industry through digital products. Our expertise lies in facilitating supply bank credit for a wide array of top-tier automobiles, across all our operations.

Achievements/Accomplishments:

- Developed an efficient admin panel to enhance internal and external operations using React.js and TypeScript to ensure operators have easy access to the documents and the operation facilities.
- Successfully refactored the design system library and legacy projects to enhance maintainability and performance.
- Conducted interviews to hire new programmers and facilitated their smooth onboarding.

Senior Front-End Developer June 2021 – June 2022 (1 year)

Miare, Engineering Team, Tehran, Iran

A dedicated company to delivering high-quality on-demand delivery services to businesses in Iran, with a network of over 9,000 partnering with restaurants, supermarkets, and pharmacies and a team of thousands of couriers.

- Optimized a mono-repo web application performance by up to 60%(Lighthouse Analyse) for rendering hundreds of transactions at the peak time in the operation panel.
- Wrote unit and visual tests and enhanced test coverage by up to 80%.
- Reviewed code to validate structures, refactored the old technology and maximized up to 50%.
- Collaborated with 14 teammates and researched customer needs to choose the best technologies.

Senior Front-End Developer (Part-time Contract) Jan 2022 – Dec 2022 (11 months)

Armani Media Agency, Engineering Team, Tehran, Iran

A leading billboard leasing company in Tehran, offering a smart platform for businesses to run and track their nationwide ad campaigns effortlessly.

- Built and implemented a platform using Next.js and TypeScript and a comprehensive design system as a library to improve design consistency and efficiency.
- Managed full-cycle design tasks, handling all phases from developing to deploying while maintaining guidelines.
- Trained 2 developers of the team to develop and maintain projects.

SKILLS

Languages:

- JavaScript (ES6+)
- TypeScript
- Familiar with Node.js

Tools and Frameworks:

- React.js
- Next.js
- Vue.js
- React-Query
- SWR
- Redux.js
- CSS3 + Sass
- Ant Design
- Material UI
- TailwindCSS
- StyledComponents
- Familiar with cypress
- React testing library
- Webpack
- Familiar with Rollup
- ViteJS
- React-hook-form
- Formik
- Storybook

Techniques:

- Clean code
- Design patterns
- Design system
- Git & Git flow
- Scrum

EDUCATION

Bachelor of Computer Engineering

Ismailic Azad University
Karaj, Iran — Sep 2019

Languages

- **English:** Professional working proficiency
- **Persian:** Native or Bilingual proficiency

Front-End Developer and Co-Founder

June 2021 – June 2022 (1 year)

Zanco Startup, Tehran, Iran

Zanco is an online educational platform with a focus on teaching based on the simulation of scientific-engineering articles.

- Architected Web application in Next.js using TypeScript and Tailwind to have 3 kinds of users communicating with each other.
- Learned to build a startup from scratch.

Front-End Developer (Remote)

June 2020 – June 2021 (1 year)

Utechia, London, England

Economic development agency here to help businesses launch their ideas with digital products.

- Launched 4 products in Next.js with TypeScript like [Varmi](#).
- Refactored 3 products in ReactJS like [Coimex B2B platform](#).

Junior Front-End Developer

June 2019 – June 2020 (1 year)

White Wizard Game Studio, Tehran, Iran

A Game studio based in Tehran that developed websites and web applications for their customers.

- Developed 4 websites and web applications using React.js and Tailwind.
- Off-topic: also developed a Back-end project using Node.js which helped me to improve my computer engineering skills such as data structures, DBMS, and algorithms.

Junior Front-End Developer

December 2018 – June 2019 (7 months)

HashBazaar Startup, Tehran, Iran

An innovative startup for building a fully monitored Bitcoin mining farm tailored for individuals and businesses.

- Developed a monitoring panel using HTML, CSS, and Javascript.
